In conclusion, this study reports a chronological atlas of natural selection in Human. The spatiotemporal distribution of recent human adaptation is a long standing question. We developed a new coalescent-based method that collectively assigned human genome regions to modes of neutrality or to positive, negative, or balancing selection.

My wife and I had often discussed the possibility of a movie. With CGI, it would seem to be a more realistic possibility. I think, in all honesty, that there has not been, and may never be, a greater literary, SF or not, series. She was the best! We will miss her! We've already decided to reread the series in chronological order.
