Purpose of the Theory of Computation: Develop formal mathematical models of computation that reflect real-world computers. This field of research was started by mathematicians and logicians in the 1930s, when they were trying to understand the meaning of a computation.

Introduction to Theory of Computation - cglab.ca

The classical theory of computation traditionally deals with processing an input string of symbols into an output string of symbols. Note that in the special case where the set of possible output strings is just {yes, no}, (often abbreviated {T, F} or {1, 0}), then we can think of the string processing as string (pattern) recognition.
