the computation of the pdf

SVD computation example Example: Find the SVD of A , $U\Lambda V^T$, where $A = \begin{pmatrix} 3 & 2 & 2 & 2 & 3 \\ 2 & 2 & 2 & 2 & 3 \end{pmatrix}$. First we compute the singular values λ_i by finding the eigenvalues of $A^T A$. $A^T A = \begin{pmatrix} 17 & 8 & 8 & 17 \end{pmatrix}$. The characteristic polynomial is $\det(A^T A - \lambda I) = \lambda^2 - 34\lambda + 225 = (\lambda - 25)(\lambda - 9)$, so the singular values are λ_i

SVD computation example A U V T A 3 2 2 AA

Human-based computation (HBC), human-assisted computation, ubiquitous human computing or distributed thinking (by analogy to distributed computing) is a computer science technique in which a machine performs its function by outsourcing certain steps to humans, usually as microwork. This approach uses differences in abilities and alternative costs between humans and computer agents to achieve ...

In computational mathematics, computer algebra, also called symbolic computation or algebraic computation, is a scientific area that refers to the study and development of algorithms and software for manipulating mathematical expressions and other mathematical objects. Although computer algebra could be considered a subfield of scientific computing, they are generally considered as distinct ...

Genetic programming (GP) is an automated method for creating a working computer program from a high-level problem statement of a problem. Genetic programming starts from a high-level statement of "what needs to be done" and automatically creates a computer program to solve the problem.
