In the mathematical field of topology, a section (or cross section) of a fiber bundle is a continuous right inverse of the projection function. In other words, if  $\pi$  is a fiber bundle over a base space  $B$ ,  $\pi : E \rightarrow B$  then a section of that fiber bundle is a continuous map  $\sigma : B \rightarrow E$  such that  $\pi(\sigma(b)) = b$  for all  $b \in B$ . A section is an abstract characterization of what it means to be a graph.

The bundle of rights is a metaphor to explain the complexities of property ownership. Law school professors of introductory property law courses frequently use this conceptualization to describe "full" property ownership as a partition of various entitlements of different stakeholders.. The bundle of rights is commonly taught in US first-year law school property classes to explain how a ...
