The Variations on a Rococo Theme, Op. 33, for cello and orchestra was the closest Pyotr Ilyich Tchaikovsky ever came to writing a full concerto for cello and orchestra. The style was inspired by Mozart, Tchaikovsky's role model, and makes it clear that Tchaikovsky admired the Classical style very much. However, the Theme is not Rococo in origin, but actually an original theme in the Rococo style.

Edward Elgar composed his Variations on an Original Theme, Op. 36, popularly known as the Enigma Variations, between October 1898 and February 1899. It is an orchestral work comprising fourteen variations on an original theme.. Elgar dedicated the work "to my friends pictured within", each variation being a musical sketch of one of his circle of close acquaintances (see musical cryptogram).

I am working (for reasons of my own) towards a comprehensive list of plausible technothriller plots from 2010 where the MacGuffin is named Satoshi Nakamoto.. Before you go off prematurely: a MacGuffin in fiction is ... "a plot device that the protagonist pursues, often with little or no narrative explanation".
