The Vermont Department of Environmental Conservation's mission is to preserve, enhance, restore and conserve Vermont's natural resources and protect human health for the benefit of this and future generations.

### **Welcome to DEC | Department of Environmental Conservation**

Sewage treatment is the process of removing contaminants from municipal wastewater, containing mainly household sewage plus some industrial wastewater. Physical, chemical, and biological processes are used to remove contaminants and produce treated wastewater (or treated effluent) that is safe enough for release into the environment. A by-product of sewage treatment is a semi-solid waste or ...

### **Sewage treatment - Wikipedia**

Introduction Biological treatment is an important and integral part of any wastewater treatment plant that treats wastewater from either municipality or industry ...

### **Biological Wastewater Treatment**

Waste water treatment is a process used to convert wastewater into an effluent that can be returned to the water cycle with minimum impact on the environment, or directly reused. The latter is called water reclamation because treated wastewater can then be used for other purposes. The treatment process takes place in a wastewater treatment plant (WWTP), often referred to as a Water Resource ...

Antero Clearwater Facility & Landfill. Antero, with its partner Veolia, is developing an industry-leading water treatment and reuse facility that provides an alternative and innovative solution to current disposal methods, creating environmental, economic and community benefits.

## **Antero Clearwater Facility & Landfill | Antero Resources**

The rapidly increasing population, depleting water resources, and climate change resulting in prolonged droughts and floods have rendered drinking water a competitive resource in many parts of the world. The development of cost-effective and stable materials and methods for providing the fresh water in adequate amounts is the need of the water industry.

The purpose of the website is to provide information regarding the Superfund program for communities, cleanup professionals, and concerned citizens.

## **Superfund | US EPA**

For the many urban trees housed in tree pits, the translation of street tree stemflow into urban stormwater capture is a function of the soil's infiltration capacity at the base of the tree, which determines how quickly

a tree pit surface can absorb the stemflow, or other stormwater, entering the pit.
