Urban design is the process of designing and shaping the physical features of cities, towns and villages and planning for the provision of municipal services to residents and visitors. In contrast to architecture, which focuses on the design of individual buildings, urban design deals with the larger scale of groups of buildings, streets and public spaces, whole neighborhoods and districts ...

Urban design - Wikipedia

Nonpotable reclaimed water is often distributed with a dual piping network that keeps reclaimed water pipes completely separate from potable water pipes.. In many cities using reclaimed water, it is now in such demand that consumers are only allowed to use it on assigned days.

Reclaimed water - Wikipedia

The City received 48 submissions (PDF, 4 MB) from architects, urban designers, planners, landscape architects, owners and University students.. Each submission was evaluated by a volunteer jury consisting of design professionals and local stakeholders. The number of awards was determined by the jury, and evaluated based on these criteria: ...

Rainwater is a valuable natural resource that has been collected by Australian households for domestic use since colonial times. Opportunities for rainwater collection and use vary with location. Urban households typically have a connection to a reticulated, treated (mains) water supply but can significantly lower mains water usage by installing a rainwater harvesting system.
