The World Wide Web has become a major delivery platform for a variety of complex and sophisticated enterprise applications in several domains. In addition to their inherent multifaceted functionality, these Web applications exhibit complex behaviour and place some unique demands on their usability, performance, security, and ability to grow and evolve.

Design is a constant exploration of creation and destruction; of cacophony and utter loneliness. We need space. We need spaces. We need spaces where we argue, spaces where we play, spaces where we rest, spaces where we think. Welcome to our space: the IBM Design Studios. At IBM Design, we donâ€™t ...

Hydraulic engineering as a sub-discipline of civil engineering is concerned with the flow and conveyance of fluids, principally water and sewage. One feature of these systems is the extensive use of gravity as the motive force to cause the movement of the fluids. This area of civil engineering is intimately related to the design of bridges, dams, channels, canals, and levees, and to both ...
