The negativity bias, also known as the negativity effect, is the notion that, even when of equal intensity, things of a more negative nature (e.g. unpleasant thoughts, emotions, or social interactions; harmful/traumatic events) have a greater effect on one's psychological state and processes than neutral or positive things. In other words, something very positive will generally have less of an ...

This paper discusses the economic impact of the Basel III reforms to banking regulation. We find that the long-term impact should be much less than many in the industry fear but the required accompanying changes to business models, business processes and governance, need to be carefully managed to avoid a severe shortage of funding.
