OVARIAN CANCER: Diagnosis and Treatment

Ovarian cancer is a cancer that forms in or on an ovary. It results in abnormal cells that have the ability to invade or spread to other parts of the body. When this process begins, there may be no or only vague symptoms. Symptoms become more noticeable as the cancer progresses.

Ovarian cancer - Wikipedia

Ovarian cancer forms in tissues of the ovary. (An ovary is one of a pair of female reproductive glands in which the ova, or eggs, are formed.) Tumors in the ovaries can be benign, which means they are not cancer, or they can be malignant, which means they are cancer.

A risk factor is anything that changes your chance of getting a disease like cancer. Different cancers have different risk factors. Some risk factors, like smoking, can be changed. Others, like a person's age or family history, can't be changed. But having a risk factor, or even many, does not ...

Ovarian Cancer Risk Factors - American Cancer Society

Chemotherapy (chemo) is the use of drugs to treat cancer. Most often, chemo is a systemic treatment, meaning the drugs enter the bloodstream and reach almost all areas of the body. Chemo can be useful to kill very small amounts of cancer cells that may still be around after surgery, for cancers that ...

Chemotherapy for Ovarian Cancer - American Cancer Society

Cancer risks for women with BRCA1/BRCA2 mutations; Cancer risks for women with BRCA1/BRCA2 mutations; Women who inherit a mutation in the BRCA1 or BRCA2 gene have a much higher risk of developing breast and ovarian cancer. But, important steps can be taken to help lower the risk for cancer in these women.

Does Breast or Ovarian Cancer Run in Your Family

Five-year age-standardised net survival for ovarian cancer has increased from 21% during 1971-1972 to a predicted survival of 46% during 2010-2011 in England and Wales – an absolute survival difference of 26

percentage points.[] Wider access to optimal primary treatment and greater determination to treat recurrent disease is likely to have contributed to the increase.[]

Access a detailed treatment regimen chart for ovarian cancer, with a focus on primary chemotherapy/primary adjuvant therapy with IV and IP options.

Ovarian Cancer Treatment Regimens - Cancer Therapy Advisor

About ovarian cancer. There are over 6,000 new cases of ovarian cancer in England each year. It causes more than 3,500 deaths in England annually, but this needn't be the case.

Ovarian Cancer | Be Clear on Cancer

Pancreatic cancer is a disease in which malignant (cancer) cells form in the tissues of the pancreas. The pancreas is a gland about 6 inches long that is shaped like a thin pear lying on its side. The wider end of the pancreas is called the head, the middle section is called the body, and the narrow end is called the tail.

Pancreatic Cancer Treatment (PDQ®)â€”Patient Version

Ovarian cancer incidence is strongly related to age, with the highest incidence rates being in older women. In the UK in 2013-2015, on average each year more than a quarter (28%) of new cases were in females aged 75 and over.[1-4] Age-specific incidence rates rise steadily from around age 30-34 and more steeply from around age 45-49, with a sharp drop in the oldest age groups.
