GENES: AN OVERVIEW. While you may remember the basic gist of DNA and genes from high school biology, here's a brief refresher. The cells throughout your body contain your DNA, or deoxyribonucleic acid. DNA is akin to your body's super complex instruction manual, which informs your body how to produce the needed proteins necessary to build your body and generate your life.

Body hair, or androgenic hair, is the terminal hair that develops on the human body during and after puberty. It is differentiated from the head hair and less visible vellus hair, which are much finer and lighter in color. The growth of androgenic hair is related to the level of androgens (often referred to as male hormones) and the density of androgen receptors in the dermal papillae.
