### **Digestive System Pdf Worksheets - Printable Worksheets**

Two “solid” digestive organs, the liver and the pancreas, produce digestive juices that reach the intestine through small tubes called ducts. The gallbladder stores the liver’s digestive juices until they are needed in the intestine. Parts of the nervous and circulatory systems also play major roles in the digestive system.

### **Your Digestive System and How It Works - Brookhaven Gastro**

The digestive tract is composed mostly of the alimentary canal (see next frame), together with accessory glands and organs. The alimentary canal is the continuous tube stretching from the mouth to the anus. Components of this tube, the various organs of the system, are specialized to perform particular functions.
